MetaTrader 5 Anti-Scalping Plugin

Introduction

The Anti-Scalping plugin is intended to employ an anti-scalping policy on a particular group of traders as to prevent them from closing orders within a specific time after opening. This plugin will prevent traders from using expert advisors to make frequent trades within a small time frame.
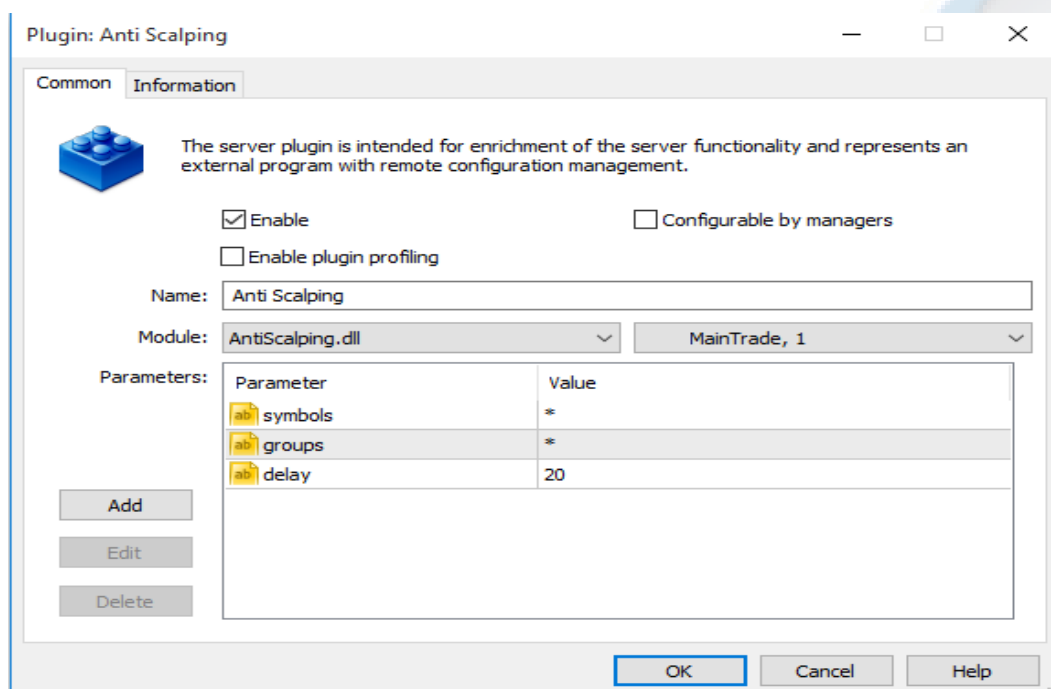

Plugin Installation

To install the plugin, the MetaTrader 5 Main Server program has to be stopped temporary before copying the AntiScalping.dll file into the "MetaTrader 5 Platform/MainTrade/plugins" in the server root directory.

1. To stop the server, click on Start/Administrative Tools/Services.
2. Under the Services window, look for MetaTrader 5 Main Trade Server and click it.
3. On the General tab, under Service status, click on the "Stop" button and wait for the MetaTrader server to stop.
4. Transfer/Copy the AntiScalping.dll file into the server root directory "plugin" folder.
5. Go back to Services window, click "Start" button to start the MetaTrader 5 Main Trade Server.

Plugin Configuration

After installation of plugin, it is necessary to configure its settings.

Parameter	Description
Symbols	List of symbols to be processed by the plugin. The symbols can be listed using templates. For example, **USD***- all symbols starting with USD; **!SILVER,!GOLD,*** - all symbols except for gold and silver.
Groups	Groups processed by the plugin. The groups can be listed using templates. For example, **demo*** - all demo groups, **!real,*** - all groups except for the real ones, **demoforex-usd, demoforex-jpy** - only groups named demoforex-usd and demoforex-jpy, respectively.
Delay	The amount of time limit in seconds which the plugin will delay a trade on the preset symbols & groups.

After configuration of the plugin, the MetaTrader 5 program has to be restarted for the new configuration to take effect. To restart, look to the top left of the MetaTrader 5 Administrator program once you have found it, please highlight the Main Server under "Network" in the left-hand side Tab then click on Restart Server, or right click the server and restart it..
